

## G346 COMPRESSED AIR SERIES

PATENT PENDING

FasTest's G346 gas connector is simple to use with a no twist, no turn approach to filling. Simply connect onto your CGA 346 valve and lock into place with a forward movement of the bail handle roller actuator and you are filling the compressed air cylinder in a matter of seconds.

- Bail handle actuation connects to CGA 346 valve
- Available in Stainless Steel or Monel and brass
- Cleaned for oxygen service
- Heavy duty handle eliminates common failures
- Simplified design has fewer seals to maintain
- One piece exterior body construction
- Available in rigid, flexible cable, and lever style handles

Product Family	Connection Type	Connection Method	Application
G-Series	External Threads	Bail Handle	Compressed Air
Connects To	Pressure Rating (psi)	Termination	Weight
CGA 346	3600	1/4" NPT (Male)	40 ounces

Part Number	Handle	Housing	Seals	Replacement Seals
G346-0411-BH	1	Stainless Steel and Brass	Viton	SG346
G346-0412-BH	2			

For EPDM seals add "E" to the part number. Example: G346-0411-BHE

Additional configurations available, consult part number key or contact **FasTest**.
